Other Overview Page Issues

- Once decisions are made on timing, text will be updated & shared with jurisdictions.
- Comments have already been received from Indiana and Ontario.
- Please consider who from your jurisdiction needs to review and approve content.

Focusing on the Results Page

The new dashboard:

- Genesis was the September 2017 Work Group meeting
- GLC entered a small contract with our web developer for this specialized content
- Water Quality and Ag-NPS Subgroups provided advice on initial content for this first version
- Contract ends February 1, so ***we need feedback now on the graphic & structure***…

Focusing on the Results Page

We do have the ability to keep improving the content within each dashboard.

Focusing on the Results Page

- In addition to the graphic, we also have the option to filter additional, more detailed content on Results for the Lake, Tributaries, & Land
- This DOES NOT match the filters on the Strategies & Investments pages (Agriculture, Communities, Monitoring, & Restoration)
- ***Should the filters match?*** (we could potentially use both options)

Focusing on the Results Page

Option 1:

- Lake
- Tributary
- Land

Option 2:

- Jurisdiction

AND

- Agriculture
- Communities
- Monitoring
- Restoration

Focusing on the Results Page: How should we filter content?

Option 1:

- Lake
- Tributary
- Land

"Big Picture" results for each jurisdiction, by activity

Option 2:

AND

- Agriculture
- Communities
- Monitoring
- Restoration
