

# Lake St. Clair Coastal Habitat Assessment:

with recommendations for conservation and restoration planning

---

## Table of Figures

Figure I. C - 1	From: "Living with the Lakes" (GLC & ACOE, 1999) .....	8
Figure I. C - 2	Watersheds that drain into Lake St. Clair .....	9
Figure I. C - 3	Lake St. Clair Delta .....	10
Figure II. A - 1	Project and watershed overview .....	13
Table II. B - 1	Population and Household Changes 1990-2000 .....	21
Table II. B - 2	1990-2000 Population and Household Estimates for Coastal Communities within Project Zone .....	22
Table II. B - 3	2000-2004 Population and Household Est. Communities within Buffer Zone .....	22
Figure II. B - 1	Population Change by Community, 2000-2030 .....	24
Table II. B - 4	2030 Regional Development Forecast for Southeast Michigan .....	25
Table II. B - 5	Pop Growth in Canadian Counties on Lake St. Clair: 1996 to 2001 .....	26
Table II. B - 6	City of Windsor, population growth estimates to 2026 .....	26
Table II. B - 7	Population Projections for Canadian Lake St. Clair Coastal Counties Through 2028 .....	27
Table II. C - 1	Southeast Michigan Labor Market and Industry Employment (1997) 33 ....	29
Table II. C - 2	Real Gross Domestic Product for Michigan (2000) 33 .....	29
Table II. C - 3	Southwest Ontario Employment Level by Industry (2000) 36 .....	30
Table II. C - 4	Real Gross Domestic Product for the Province of Ontario by Industry (2000) 37 .....	31
Figure III. B - 1	Southeast Michigan quaternary geology .....	51
Figure III. C - 1	Lake St. Clair historic water levels .....	52
Figure III. D - 1	U.S. Circa 1800 Vegetation .....	54
Figure III. D - 2	Source: Michigan Natural Features Inventory .....	55
Figure III. D - 3	Source: Michigan Natural Features Inventory .....	55
Table III. D - 1	Land Cover Types in Project Area, 1995 .....	56
Figure III. D - 4	Project Area Land Cover Distribution 1995 .....	56
Table III. D - 2	Land Cover Types in Project Area by Group .....	56
Table III. D - 3	Land Cover Types in Project Area, 2000 .....	57
Figure III. D - 5	Project Area Land Cover Distribution 2000 .....	57
Figure III. D - 6	Project Area Land Cover Percentage Gained Distribution .....	57
Figure III. D - 7	Project Area Land Cover Percentage Loss Distribution .....	58

Figure III. D - 9	Major Land Cover Changes in Project Area, 1995 - 2000 .....	58
Table III. D - 4	Ontario Project Area Land Cover Distribution16 .....	59
Table III. D - 5	Michigan Project Area Land Cover Distribution17 .....	59
Figure III. D - 10	2000 Project Area Land Cover Classifications .....	60
Figure III. E - 1	Water Clarity .....	60
Figure III. E - 2	Lake St. Clair Substrates .....	61
Figure IV. A 2 - 1	High and low intensity developed lands .....	65
Figure IV. A 3 - 1	Cultivated Lands .....	68
Figure IV. A 4 - 1	Grasslands .....	69
Figure IV. A 5 - 1	Deciduous forest.....	76
Figure IV. B 2 - 1	Emergent wetlands .....	83
Figure IV. B 2c - 1	Great Lakes coastal wetlands .....	87
Figure IV. B 3 - 1	Forested Wetlands .....	90
Figure IV. B 4 - 1	Scrub/shrub wetlands .....	93
Figure IV. B 5a - 1	Fish Assemblages across Lake St Clair .....	95
Figure IV. B 5a - 1	Fish Assemblages across Lake St Clair .....	96
Figure IV. B 6b - 1	The distribution of aquatic vegetation across Lake St Clair (Robert Haas, Bruce Manny, Don Schloesser) .....	98
Figure IV. B 6b - 2	The number of plant taxa found in Lake St. Clair .....	99
Figure V. C 3 - 1	Areas of concern are spread throughout the Lake St Clair–Lake Erie basin. Areas of concern are shown in red97 .....	125
Table V. C 3 - 1	The Clinton and Detroit Rivers have some of the highest concentrations of pollutants, most several times the Probable Effect Level (PEL), in the region. (Rheaume, 1990-1997) Ten River basins with the highest level and frequencies of bed-sediment contamination in the Lake Erie – Lake St. Clair Drainages, 1990-97 .....	126
Figure V. C 3 - 4	Interpolation using inverse distance weighted shows the distribution of mercury contaminants in silty sediments around Lake St Clair as being extreme in the center of the lake. The Environment Canada and Great Lakes Guidelines show levels greater than .171 mg/kg to be above the threshold effect level (TEL), and levels greater than .486 mg/kg at being above the probable effect level (PEL)102 .....	126
Figure V. D 2 - 1	Shoreline armoring extent within the project area .....	128
Figure V. D 2 - 2	Lake St. Clair shoreline type by percentage .....	129
Table V. E - 1	Key Invasive Species in Lake St. Clair Coastal Region .....	141
Figure VII.C 1b - 1	Element Occurrence Frequency .....	201
Table VII.C 1a - 1	Values Assigned for Species' Global and State Ranks and Element Occurrence Ranks .....	202
Table VII.C 1b - 1	EO Frequency Count Results .....	202
Table VII.C 1c - 1	EO Probability Model Results .....	203

Figure VII. C 1c - 1	Element Occurrence Probability .....	203
Figure VII. C 1d - 1	Biodiversity .....	204
Table VII. C 1d - 1	EO Biodiversity Value Model Results .....	204
Table VII. C 2c - 1	Site Criteria .....	209
Figure VII. C 2d - 1	Potential Conservation Areas .....	211
Table VIII. B - 1	MI. Circa 1800 vs 2000 vegetation cover .....	223
Table VIII. B - 2	Ontario. Circa 1800 vs 2000 vegetation cover in acres .....	223
