

Appendix B: Review of Great Lakes Monitoring Inventory and Gap Analysis: Conference Call Participants

Appendix B: Review of Great Lakes Monitoring Inventory and Gap Analysis: Conference Call Participants

The following individuals participated in a series of conference calls or otherwise provided review comments on sections of the *Great Lakes Monitoring Inventory and Gap Analysis*. The reviewers are listed under the report section they reviewed. In most cases, the reviewers filled in missing information in our inventory, corrected errors or inaccuracies in our analysis and provided additional monitoring gaps or comparisons for us to consider. As authors of the report we are grateful for the guidance they provided, which, on the hole, significantly improved the content of the report. However, the reviewers' role was strictly advisory and, as such, the authors bear full responsibility for the final report content.

Fish Advisory/Fish Population
