

AOC Summit Breakout Session I

Agenda

- Who: Participants working in small groups by individual AOC
- Venue: Round tables for each AOC in the main room
- Outcome: Review of state criteria and any available local criteria for restoration of the specific beneficial use impairments in each AOC; review of available boundary maps
- Handouts: Boundary maps, Customized restoration criteria handout for each AOC, decision process flowchart
- Support: Laptop computers, State staff and EPA staff rotating among tables

Actions:

1. Participants will review and discuss status of boundary maps
2. Participants will review the flowchart of the process for Adopting Restoration Criteria, and then review the criteria handout which includes both state and local criteria for each BUI in their AOC. After the review, the group will make recommendations to take back to their PAC on whether to use state or local criteria for each of the BUIs. On the laptop, the recommended criteria should be noted in BOLD text.
3. ID issues for discussion in Breakout Session II and record them on a separate paper

Notes:

Discussion needs to focus on BUI restoration criteria and not on remedial actions.

Those AOCs that do not finish will have an opportunity to do so in the final Breakout on Day 2.
