

Great Lakes HABs Collaboratory

Linking Science and Management to Reduce Harmful Algal Blooms

HABs State of the Science Webinar series: HABs Blooms Detection, Composition & Effects
Tuesday July 19, 2016, 11:00 a.m. - 12:00 p.m. (EDT)

Q/A follow-up

Question for James Larson, U.S. Geological Survey: Are you working with fish managers to use fish metrics as correlates of cyanobacterial indexes?

We are not, but this has been a goal for a while. Haven't had the right opportunity arise yet to incorporate this kind of data.
